

Tur Estrada, Ricardo
University of UVigo
Nationality: Spain

Orientation: Sustainable Use of Marine Resources
Specialization Area: Aquaculture
Research Area: 2.8 Marine ecology and cultures

PhD project: *Octopus vulgaris* culture and Physiology of Stress in common octopus paralarvae under culture conditions

Supervisors: Dr. Marcos López Patiño (University of Vigo)
Dr. Eduardo Alamansa Berro (Spanish Oceanographic Institute)
Dr. Gabriel Cardenete (University of Granada)

Summary: *Octopus vulgaris* paralarvae culture, study their physiology of stress, through the characterization of specific biomarkers that enable to quantify accurately and effectively the paralarvae status under different culture conditions, improving their survival and growth.
