Nationality: Spanish

Orientation: Technological Progress, Engineering and Business Management
Specialization Area: Energy
Research Area: 4.13 Energy efficiency

PhD project: Energy efficiency in the fishing sector

Supervisors: Dr. Camilo José Carrillo González (University of Vigo)

Summary: This thesis focuses on analysing and assessing of the opportunities for the implementation of systems that improve energy efficiency, including the implementation of renewable energies, in the different areas of the fishing sector. Special attention will be paid to those processes with greater energy intensity, in addition to those in which the potential for reducing energy consumption is greater.
